

Allergy Product Line

Allergy Associates Management Services strives to provide the best products and services for allergy diagnostics and management of allergic disease. Starter kits include all the supplies needed to get your allergy program up and running, as well as expert implementation and consulting services.

Simple, Safe and Painless Testing

- CLIA-free skin tests; no complex lab equipment or needles
- Results develop in just 15 minutes
- Easy-to-follow procedure
- Excellent income potential
- Non-specialty specific
- Covered by all major insurance carriers and Medicare (CPT 95004), or offer cash-pay

Environmental Allergy Starter Kits

- High ROI; clinic reimbursed by insurance
 - Avg. \$500 per patient (95004 x 72 units)
- Main Contents:
 - Tray set with sterile antigen wells and lids
 - (72) 5ml antigen vials include positive & negative control solutions, 70 environmental allergens – for up to 400 skin tests
 - Multi-prong, NEEDLE-FREE skin test applicators for your first 40+ patients
- Your order also includes: virtual training, marketing materials, clinic documentation, ancillary tools, and access to immunotherapy

Environmental+Food Allergy Starter Kit

- Includes everything above plus 10 food allergen extracts for a total of **80 test units**, and 10-prong applicators for your first 50 patients
- When you are running low on supplies, order what you need without having to buy another testing kit.

Pediatric Allergy Starter Kit

- Much like the 80-unit starter kit, this includes the full setup for allergy testing – only with a smaller test panel & applicators for 60 patients
- (24) 5ml antigen vials for up to 400 skin tests include positive & negative control solutions, select pollens, molds, animal proteins, dust mite, and 8 common food allergens
- Pre-set for expansion in the form of additional panels to meet the unique needs of your practice and your patients as your allergy program evolves

Food Allergy Starter Kit

- Test for up to 46 allergenic foods, +/- controls
- (48) 5ml antigen vials, testing trays with 48 sterile antigen wells, (200) or (400) 8-prong applicators
- Stand-alone kit that allows for additional testing options to accompany environmental panels

Custom Allergy Testing Kits

- Create your own panel with our expert advice!
- Complete Custom 50 Allergen Test Kit:
 - 50-Panel Starter Kit with Env/Food allergens of choice, 10-prong applicators for the first 40 patients, marketing materials & ancillary tools
- Ala Carte – Choose any number of allergenic extracts (minimum of 10), testing tray(s), 8-prong or 10-prong applicator packs, and optional accessories
- For quick & easy forearm application at minimal cost, our most condensed panel includes 10 antigens for big picture results: +/- controls, cat, dog, dust mites, cockroach, weed mix, grass mix, tree mix, and mold mix

Results-based Treatment Options

- It is usually not enough just to test for allergies; the largest benefit to the patient comes when the provider can offer effective treatment.
- Allergy Associates offers immunotherapy options that can put allergies into remission.
- Like skin testing, immunotherapy is a great way to generate more revenue for the practice while providing a much-needed service to patients.
